

# Just a dream

---

Nose in the wind,  
Just smelling a flower,  
I am breathing,  
And life I discover,

It can't be true,  
It can't happen to me,  
In my country, in my country

**I know it's just a dream, Just a dream, and nothing else  
I don't really exist in this country, for love no place, for us no place...**

I'm walking free  
Doing everything I want  
I run I sleep  
Life is not violent

A glance at your eye  
There's something between you and I  
It's not reality, it's my country

**But I know it's just a dream, Just a dream, and nothing else  
I don't really exist in this country, for love, no place, For us no place...**

Strokes on my back  
Giving me the shivers  
I put my black  
Head on your shoulders

I'm sure I dream  
For us no proof of love  
It's my country, it's my country

**But I know it's just a dream, Just a dream, and nothing else  
I don't really exist in this country, for love, no place, for us no place...**

Galgos in Spain  
Dream for a better life,  
Far away from pain,  
We didn't know your strife

Trying to change,  
Traditions and laws  
Fighting for us, fighting with us

**But we keep alive this dream, Just this dream, And nothing else  
'Cause We do really exist, Please change their mind, we still have faith  
But we keep alive this dream, Just this dream, And nothing else  
'Cause We do really exist, With you at our side, we still have faith  
But we keep alive this dream, Just this dream, And nothing else  
'Cause We do really exist, Please change their mind, we still have faith...**
